### Recap quiz

1. A river usually doesn't dry up because of The Water Cycle  
A. True B. False
2. Water goes from the sea into the sky through a process called precipitation.  
A. True B. False
3. Rivers are formed by the collection and run-off of rain water.  
A. True B. False

L.Q. Can I describe and understand key aspects of a river?

Key Vocabulary: upstream, downstream, midstream

L.Q. *Can I describe and understand key aspects of a river?*

Match the labels with the pictures

- Quick, lots of energy, dynamic, growing quickly
- Bigger, not so fast, still lots to do, finding way
- Slow, full, lots of memories, less energy

L.Q. Can I describe and understand key aspects of a river?

The same applies to rivers

a young river - the upper course ['upstream']

- steep hills, fast-flowing, waterfalls

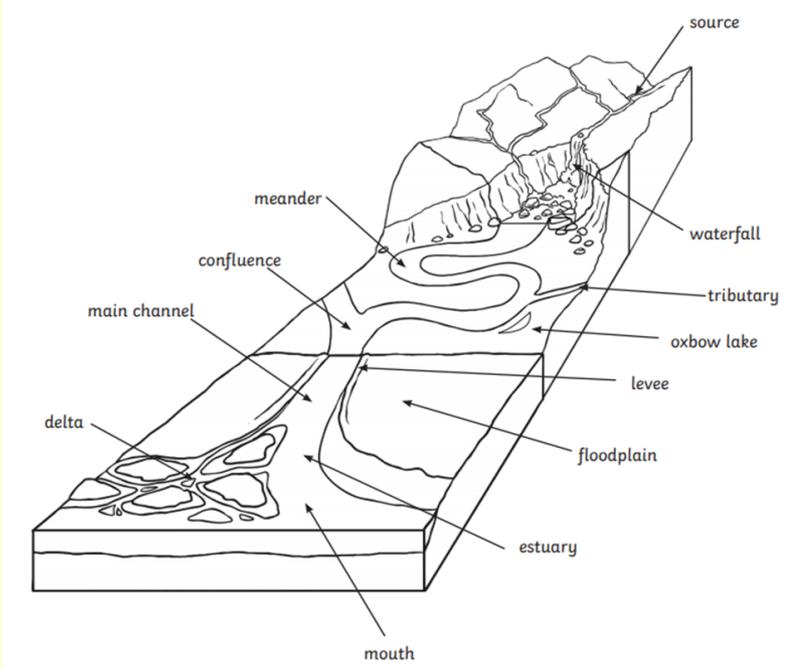

a middle-aged river - the middle course ['midstream']

- meandering, depositing stones and gravel

an old river - the lower course ['downstream']

- large and silty, muddy banks, reaches sea

L.Q. Can I describe and understand key aspects of a river?

L.Q. Can I describe and understand key aspects of a river?

Let's compare and contrast: What is the difference between these two rivers? What is similar? Where do you think they are? Why?

L.Q. Can I describe and understand key aspects of a river?

Your turn. Complete the label a river worksheet.

L.Q. Can I describe and understand key aspects of a river?

If you were a river what type of river would you be?

Slow and relaxed? Or fast and busy?

Would you have waterfalls and rush along in a hurry? Or would you 'meander' gently along?

### Quick quiz of the week
